Response to Amendment

1. Applicant's arguments/remarks filed on 7/23/2004 regarding claims 2-9, 12-18 have been considered.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The present application relates to providing a adaptive jitter buffer management system for digital voice signals received from a data network, including the unique steps of performing the method of "comparing an average packet delay with a reference delay corresponding to temporally centered position in a jitter buffer, and adjusting variable rate of transfer of packets from said buffer when said average packet delay deviates from said centered position by more than a threshold amount, thereby moving said centered position to align with said average packet delay." The closet prior art, Ohlsson (USP 6,452,950), discloses an adaptive jitter buffer management system that performs the method of minimizing delay in packet delivery of digital voice communication. However, Yoshikazu fails to anticipate or render obvious the above quoted limitations of the present application. This renders it allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Mew whose telephone number is 571-272-3141. The examiner can normally be reached on 9:00 am - 5:30 pm.
